Principles for Responsible Investment

PUBLIC TRANSPARENCY REPORT

2023

Eyb & Wallwitz Vermögensmanagement GmbH

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

Why does your organisation engage in responsible investment?

• What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Ever since Eyb & Wallwitz was founded in 2004, we are caring and encouraging sustainable investments. In 2012 we made the conscious decision to sign the "Principals for Responsible Investment" (UN PRI) which is passed by the UN, thereby also officially committing ourselves to the topic of sustainability in compliance with the required six principles. As an active asset manager, we are convinced that sustainable business practices go hand in hand with economic added value in the long term. Accordingly, in our investment decisions we also take ESG aspects into account, irrespective of financial parameters, to preserve value and create long-term and sustainable added value for our clients. In our holistic ESG approach, we do not differentiate between E (Environmental), S (Social) or G (Governance), but see these three areas as a complementary unit. The ESG criteria are determined individually and with great care by Eyb & Wallwitz for more sustainable action, also in investment matters, and run like a cross-section - from equities to fixed income - through the portfolio. The consideration of ESG aspects in our investment process enables us not only to highlight opportunities, but also to identify potential sustainability risks in companies to exclude them as far as possible. We achieve this through established approaches such as negative screening, which enable us to align our investment decisions with environmental, social, or corporate values.

Section 2. Annual overview

Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.

Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):

- refinement of ESG analysis and incorporation
- stewardship activities with investees and/or with policymakers
- collaborative engagements
- attainment of responsible investment certifications and/or awards

A major achievement in sustainable investing this year was the active engagement in the controversy regarding the Volkswagen issue in the Xianjiang region. Our engagement letter to the VW Investor Relations team questioned the ongoing controversy regarding the employment of Uyghurs. We discussed this issue with both, the Volkswagen Investor Relations Team and the corresponding ESG data experts from MSCI, who raised the concern following several articles, most prominently from the BBC. Since no timely solution regarding this issue was found, we disinvest all Volkswagen bonds.

Moreover, in 2022 we started to measure the Principle Adverse Impact Indicators (Sustainable Finance Disclosure Regulation (SFDR),) for the Phaidros Funds. These indicators will guide us for further engagement action.

Section 3. Next steps

What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

So far, we will remain with our currently implemented ESG standards, as we are complying for our Phaidros Funds with article 8 of the Sustainable Finance Disclosure Regulation since March 2021. Major next steps include increasing active engagement in controversies to improve the PAI indicators.

Provide an example of how you incorporated ESG factors into your equity selection and research process during the reporting year.

While evaluating one of our equity stocks "Palo Alto (PANW US)", we started with negative screening of our general exclusion criteria and ESG minimum standards, e.g. the UN Global compact. After that, we go into company specific ESG issues, starting from environmental things like GHG emissions compared to peers, go to social matters like stuff turnover, talent support, privacy matters and check for governance practices, e.g. is there an independent board etc. This research is usually done based on our ESG data provider MSCI and company specific reports.

A summary of this looks like: In 2022 Palo Alto Networks improved its corporate governance practices. No elected director received dissent votes in the 2022 AGM, unlike in the 2021 AGM (the lead director received more than 15% dissent votes). Besides, we note a decreased trend in dissent votes for executive pay: to 5.9% in 2022 from 58.8% in 2020; this may indicate shareholder satisfaction. We also note improved disclosures on staff turnover (FY 2020-22: ~13%); this supports performance comparison with peers. The company's corporate governance practices are average relative to those of global peers. The board is majority independent; this may enhance oversight of management. Besides, the company has adopted the 'one share one vote' principle, which aligns shareholders' economic exposure and voting power. Palo Alto Networks relies on skilled cybersecurity experts to enhance its platforms and thus may face hiring and retention challenges. Like leading peers, it provides a strong suite of welfare benefits, and employee upskilling opportunities through its dedicated platform FLEXLearn. As a cybersecurity solutions provider, Palo Alto Networks may face risks such as reputational loss in case of breaches, due to clients' reliance on its ability to secure data. Moreover, it operates in the US (FY 2022: ~74% operations)-a market with stringent data privacy regulations. The company has adopted strong data security programs relative to peers, including vulnerability assessments and board-level oversight of its cybersecurity programs.
